Note: These are unpublished data from the Current Population Survey, not seasonally adjusted. As with data from any sample survey, small levels, or percentages with small denominators, should be used with extreme caution if at all. Percentages or rates with a base of less than 75,000 for a monthly

estimate, 60,000 for a quarterly estimate, and 35,000 for an annual estimate do not meet BLS' standard for statistical reliability.
