

Elevate America Technical Professional Vouchers for Online Courses: These vouchers are used to complete online courses for individuals who use, or will use, Microsoft professional information technology applications including server administration, web and application programming, and other professional technical areas. This series of online courses is specifically designed to provide the knowledge and skills necessary to pass Microsoft Technical Certification exams. Each collection of courses is focused on a single Microsoft product, such as Windows Server, SQL Server, SharePoint, and Visual Studio.

In this category there are many courses offered and organized in Learning Areas. Individuals may need to be issued several vouchers depending on how many courses in each learning area they want to complete. Upon completing a course, the individual may download and print a certificate of completion.

The distribution of vouchers takes place between July 31 - October 31, 2009. Individuals who are assigned online learning vouchers during that period must “redeem” their vouchers online before October 31, but have 12 months to complete the online learning courses.
