Overview:

Illinois is committed to using a clear set of metrics in ensuring a customer-centered, transparent data-driven workforce system that meets the diverse needs of businesses and jobseekers. The Illinois Performance and Accountability System (IPATS) is the foundation for informing aligned and integrated service delivery approaches that focus on continuous improvement and innovation. By syncing with Illinois Workforce Development System (IWDS) data, IPATS will ensure data validation across WIOA programs highlighting WIOA's 5 key indicators that are reported to DOL each year, as well as additional indicators regarding customer engagement. Data is input, managed, and maintained in IWDS, and it remains the system of record. IPATS will update based on data input into IWDS using the syncing timeframes identified in the footer.

Data Source:

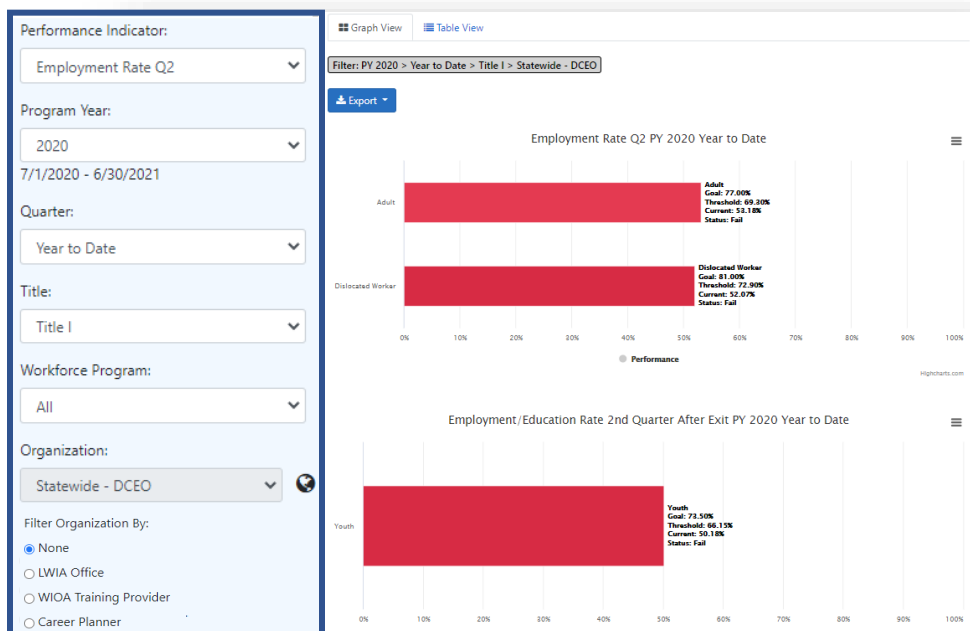

This information is brought to you by the Illinois Workforce Development System (IWDS) and Department of Commerce and Economic Opportunity Office of Employment and Training. It is only available to authorized users but is intended to promote transparency of IWDS data. IPATS Performance Customer Engagement data is pulled in real time. Performance Indicator data is synced on a weekly basis. The data displayed is to serve as a reporting and management dashboard for tracking state workforce assistance program activity and outcomes. This data will not be provided to outside parties or used to report to the Department of Labor as certified performance outcomes. Reporting will remain with each agency and be reported via their respective systems of record.

Performance Tools

This dashboard will be used to track individual customer performance data in the IWDS system focused on the WIOA Reporting Key Indicator with additional customer engagement measures included.
