The data and information that currently are available for each primary performance indicator vary across indicators, and across the core programs. The Departments will continue to use the transition authority under 503(a) of WIOA to designate certain primary indicators of performance as "baseline" indicators in the State Plan.

## Illinois – Workforce Innovation Opportunity Act (WIOA) PY2020 and PY 2021 Illinois Performance Expected Levels of Performance Prior to Negotiations UNIFIED STATE PLAN – TABLE 14

\*Title II Adult Education Employment Rate 2nd Quarter and 4th Quarter after exit and Median Earnings indicators require a file submittal to the state wage agency in order obtain wages on the individuals. The matching algorithm requires to match with SSN. Not all Adult Education individuals provide their SSN. Therefore, these performance indicators will be diminished by the amount of those individuals whose wages cannot be matched. Those without SSN are included in the tracking cohort denominator but will not be included in the numerator. This results in undercounting for successful employment. No self-reported or survey data from programs on successful employment of students are included in these rates but Illinois is investigating the feasibility of such processes.

	Measurable Skill Gains was a baseline measure in PY18/19. It will be negotiated in
	PY2020 and PY2021. Based on PY2018 data that was collected, there were 6,392
	participants that received 3,243 MSG for a rate of 50.6. Illinois will use this rate to
	establish the PY20/21 expected level of performance for that measure.

TITLE II ADULT EDUCATION	MSG targets are to be negotiated for PY2020 and PY2021 based on prior targets and performance. Illinois has also established a MSG target of 46% for PY2019. These targets coupled with actual performance for the MSG indicator will be used to establish the

	occur in late winter. Additionally, data has been collected on the follow-up measures and the performance in these areas will also become a part of the negotiation targets for PY20/21. During and prior to PY2019 targets were not established while these measures were in the baseline collection time period.  *It's important to note that current matching algorithms to track individuals into employment require an SSN. While students without an SSN are included in the tracking cohort (i.e. denominator), only students with a valid SSN are able to be successfully tracked and positively counted for employment. This results in undercounting for successful employment. No self-reported or survey data from programs on successful employment of students are included in these rates but ICCB will be investigating the feasibility of such processes.
TITLE III WAGNER- PEYSNER	Non-baseline measures - Employment Rate 2nd and 4th Quarter After Exit and Median Earnings were negotiated in PY2018 and PY2019. Based on a full year of actual outcomes in PY2018, Illinois' expected outcomes in these measures for PY20/21 will remain the same as the negotiated measures in PY18/19 with the exception of Employment Rate 4th Quarter After Exit that will increase from 60.0 to 61.0 in PY20/21. Credential Attainment and Measurable Skill Gains do not apply and will never be reportable for WIOA Title III Wagner-Peyser.
TITLE IV VOCATIONAL REHABILITATION	All measures were Non-baseline measures in PY18/19. The Department of Human Services- Vocational Rehabilitation Services (DHS-VR) has been collecting data for the baseline Measurable Skill Gains indicator per the Department of Education's requirements. After analyzing the data collected, planning and operations team have decided that the most conclusive and predictive information can be obtained from the PY2018 data. In PY2018, there was a total of 3,564 post-secondary participants, 2,217 achieved Measurable Skill Gains to achieve a rate of 62.2. DHS-VR has been conducting intensive training and implementing new and innovative methods to improve MSG attainment rate. For the PY2020 and PY2021 Expected Levels of Performance, and first year of negotiation on this measure for DHS-VR, the agency is proposing to set the expected level of MSG at 62.2.
