Why does this matter?

The data in the overview chart is based on people that are (or were) enrolled in WIOA and they are in (or completed) the training program.

If a program has a low number for Total WIOA Enrollment, it can still be a good program. It may be a new program so there is less data about the program and the placement/wage data.

A program with a higher number has more data about the program and the placement/wage data overview chart.

Just keep it in mind when looking at the data. It's kind of like when you look at reviews before you buy something.
