Home Page Instructions

If for any reason a laptop needs to have its homepage reset or it needs the malware or virus protection re-installed you would follow these steps:

How to Set the Homepage

The homepage should be set at www.ilepic.com for both IE11 and Chrome.

IE11-

1. Open Internet Explorer by clicking the Internet Explorer icon on the taskbar.

2. Click the **Tools** button ⚙, and then click **Internet options**.

3. On the **General** tab, under **Home page**, enter the URL of the site you want to set as a home page. You can add more than one URL, or add the site you're currently viewing by clicking **Use current**. If you add more than on URL, put each URL on its own line.

4. Click **Apply**, and then tap or click **OK**. The next time you open a new browsing session or window (or tap or click the **Home** button), your home pages will be loaded automatically.

Chrome-

1. Open Chrome.

2. In the top-right corner, click the Chrome menu ≡

3. Select **Settings**.

4. Under "Appearance," check the box **Show Home button**.

5. Below "Show Home button," click **Change** to choose your homepage.

6. The Home button 🏠 will appear to the left of your address bar.
