Choose Not to Participate

There are a number of reasons why a participant may choose not to participate after the eligibility process has been completed:

- They do not like the choices of training opportunities;
- They didn't realize there was training before they got a job;
- Their situation changed between the application appointment and follow-up appointment.

Follow the **EPIS survey** section steps (above) to capture the data for the individual.

1. Enter the participant information.
2. On the informed consent page, check the box that indicates the person is not giving consent.
3. Return to EPIC, go to **Eligibility Review** tab, mark person as **Decline to Participate** under **Eligibility Status** section at the bottom of the page.
4. If they are mandatory, refer them through the local job placement program procedures.

*If you are with an EPIC partner organization but cannot access the dashboard, you need to request access.
