Virus Protection
How to Run a Scan and Update

How to check to see if a Scan Needs to be Ran

1. Left click on the upward pointing arrow on the bottom right corner of your screen.
2. Find the Microsoft Security Essentials Icon.
3. A **green** Icon means your computer is protected an **orange** icon means there is a potential threat and that a scan needs to be ran.

How to Run a Scan

1. Click the **start** button in the bottom left corner.
2. Type in **Microsoft Security Essentials** in the **Search** box.
   a. It could already be listed in recent programs in the start menu.
3. **Open** Microsoft Security Essentials.
4. Click the **Scan Now** button.
5. When your scan is complete it will appear green.
How to Run an Update

1. Run a Scan before updating (See How to Run a Scan).
2. Click on the **update tab**.
