Purpose

The intake process uses system generated recommendations in combination with a career planner review to ensure customers are suitable for a program. This process includes three main steps:

1. Customer completes the online intake form. Illinois workNet system uses the submitted forms to organize customers by grantee, generate program recommendations, and populate initial assessment results.
2. Staff completes the intake review by:
 - a. Reviewing the customer’s responses related to employment goals and baseline questions.
 - b. Comparing their responses to the training program baseline requirements; and
 - c. Discussing the results and options with the customer to identify a good customer-to-program match.
 - d. Reviewing eligibility requirements and collecting the appropriate documentation.
 - e. Updating the eligibility status field to:
 - i. Enrolled, or
 - ii. Identify the reason why the customer is not going participate and to document recommended next steps or referrals.
3. Grantee staff may contact LWIA staff about interested and eligible customers to complete enrollment into WIOA.
4. LWIA staff will complete the IWDS application and verify supporting eligibility documentation if the customer is enrolled into WIOA.

Who Enters/Maintains Data

Customers complete the intake form. Once submitted, the customer cannot update the information.

Intermediary – Intermediaries or Navigators - can update their customer’s online intake form based on their conversation with the customer. Updates can be made to the intake form up to the point where the customer is enrolled in the Illinois workNet system. At that point, the intake form is locked.

Intermediary accesses the customer’s intake review page to discuss recommended programs, identify required eligibility documentation, and update eligibility status information.
