The data and information that currently are available for each primary performance indicator vary across indicators, and across the core programs. The Departments will continue to use the transition authority under 503(a) of WIOA to designate certain primary indicators of performance as "baseline" indicators in the State Plan.

Illinois – Workforce Innovation Opportunity Act (WIOA) PY2020 and PY 2021 Illinois Performance Expected Levels of Performance Prior to Negotiations UNIFIED STATE PLAN – TABLE 14

PY2020 and PY2021 WIOA Expected Levels of Performance for Illinois - NARRATIVE

F 12020 and F 12021	WIOA Expected Levels of Performance for Illinois - NARRATIVE
TITLE I	Non-baseline measures - Employment Rate 2nd and 4th Quarter After Exit, Median
ADULT	Earnings, and Credential Attainment were negotiated in PY2018 and PY2019. Based on a
	full year of actual outcomes in PY2018, Illinois' expected outcomes in these measures for
	PY20/21 will remain the same as the negotiated measures in PY18/19 with the exception
	of Median Earnings that will increase from \$5,460 to \$5,700 and Adult Credential
	Attainment that will increase from 63.0 to 67.0 in PY20/21.
	Measurable Skill Gains was a baseline measure in PY18/19. It will be negotiated in
	PY2020 and PY2021. Based on PY2018 data that was collected, there were 6,392
	participants that received 3,243 MSG for a rate of 50.6. Illinois will use this rate to
TITLE	establish the PY20/21 expected level of performance for that measure.
TITLE	Non-baseline measures - Employment Rate 2nd and 4th Quarter After Exit, Median Earnings, and Credential Attainment were negotiated in PY2018 and PY2019. Based on a
DISLOCATED	full year of actual outcomes in PY2018, Illinois' expected outcomes in these measures for
WORKER	PY20/21 will remain the same as the negotiated measures in PY18/19 with the exception
	of Median Earnings that will increase from \$7,600 to \$7,700 in PY20/21.
	Measurable Skill Gains was a baseline measure in PY18/19. It will be negotiated in
	PY2020 and PY2021. Based on PY2018 data that was collected, there were 4,191
	participants that received 1,995 MSG for a rate of 47.6. Illinois will use this rate to
	establish the PY20/21 expected level of performance for that measure.
TITLE I	Non-baseline measures - Employment Rate 2nd and 4th Quarter After Exit, and
YOUTH	Credential Attainment were negotiated in PY2018 and PY2019. Based on a full year of
100111	actual outcomes in PY2018, Illinois' expected outcomes in these measures for PY20/21
	will remain the same as the negotiated measures in PY18/19 with the exception of
	Employment Rate 4th Quarter After Exit which will increase from 62.0 to 65.0 in
	PY20/21.
	Measurable Skill Gains was a baseline measure in PY18/19. It will be negotiated in
	PY2020 and PY2021. Based on PY2018 data that was collected, there were 4,487
	participants that received 2,005 MSG for a rate of 44.7. Illinois will use this rate to
	establish the PY20/21 expected level of performance for that measure in PY20/21. Youth
	Median Earnings was a baseline measure in PY18/19. It will be negotiated in PY2020 and
	PY2021. Based on PY2018 data that was collected, the Median wage was \$3,600. Illinois
	will use this rate to establish the PY20/21 expected level of performance for that
	measure.
TITLE II	Title II Adult Education previously negotiated targets for Measurable Skill Gain
ADULT	performance for PY2018 and PY2019. In PY2018 Adult Education met the state
EDUCATION	negotiated target of 44%, meeting 10 of 11 EFL targets as established under National Reporting System (NRS) guidelines. Based on PY2018 data collected 24,825 out of 55,405
	participants (44.8%) earned a MSG. MSG through improvement of basic academic skills
	is essential on the pathway toward earning credentials.
	MSG targets are to be negotiated for PY2020 and PY2021 based on prior targets and
	performance. Illinois has also established a MSG target of 46% for PY2019. These targets
	coupled with actual performance for the MSG indicator will be used to establish the
	PY20/21 expected level of performance for that measure. Negotiations for these rates

^{*}Title II Adult Education Employment Rate 2nd Quarter and 4th Quarter after exit and Median Earnings indicators require a file submittal to the state wage agency in order obtain wages on the individuals. The matching algorithm requires to match with SSN. Not all Adult Education individuals provide their SSN. Therefore, these performance indicators will be diminished by the amount of those individuals whose wages cannot be matched. Those without SSN are included in the tracking cohort denominator but will not be included in the numerator. This results in undercounting for successful employment. No self-reported or survey data from programs on successful employment of students are included in these rates but Illinois is investigating the feasibility of such processes.

Illinois – Workforce Innovation Opportunity Act (WIOA) PY2020 and PY 2021 Illinois Performance Expected Levels of Performance Prior to Negotiations UNIFIED STATE PLAN – TABLE 14

ONITIED STATE FEAR	
	occur in late winter. Additionally, data has been collected on the follow-up measures and the performance in these areas will also become a part of the negotiation targets for PY20/21. During and prior to PY2019 targets were not established while these measures were in the baseline collection time period. *It's important to note that current matching algorithms to track individuals into employment require an SSN. While students without an SSN are included in the tracking cohort (i.e. denominator), only students with a valid SSN are able to be successfully tracked and positively counted for employment. This results in undercounting for successful employment. No self-reported or survey data from programs on successful employment of students are included in these rates but ICCB will be investigating the feasibility of such processes.
TITLE III WAGNER- PEYSNER	Non-baseline measures - Employment Rate 2nd and 4th Quarter After Exit and Median Earnings were negotiated in PY2018 and PY2019. Based on a full year of actual outcomes in PY2018, Illinois' expected outcomes in these measures for PY20/21 will remain the same as the negotiated measures in PY18/19 with the exception of Employment Rate 4th Quarter After Exit that will increase from 60.0 to 61.0 in PY20/21. Credential Attainment and Measurable Skill Gains do not apply and will never be reportable for WIOA Title III Wagner-Peyser.
TITLE IV VOCATIONAL REHABILITATION	All measures were Non-baseline measures in PY18/19. The Department of Human Services- Vocational Rehabilitation Services (DHS-VR) has been collecting data for the baseline Measurable Skill Gains indicator per the Department of Education's requirements. After analyzing the data collected, planning and operations team have decided that the most conclusive and predictive information can be obtained from the PY2018 data. In PY2018, there was a total of 3,564 post-secondary participants, 2,217 achieved Measurable Skill Gains to achieve a rate of 62.2. DHS-VR has been conducting intensive training and implementing new and innovative methods to improve MSG attainment rate. For the PY2020 and PY2021 Expected Levels of Performance, and first year of negotiation on this measure for DHS-VR, the agency is proposing to set the expected level of MSG at 62.2.
